

## WingX ReadMe File

### WingX for the Pocket PC – Version 1.7.0.2

**Note:** If upgrading, please close WingX (Tools|Close WingX) before installing.

WingX for the Pocket PC is an aviation application written specifically for use on a PDA running the Microsoft Pocket PC Operating System. WingX allows pilots to quickly perform weight and balance calculations, get route and A/FD information, determine sunrise and sunset information, perform E6B calculations, and view FARs and the AIM as well as other documents such as AC61-65D. WingX also remembers currency, and expiration dates.

#### **King Schools Customers:**

Please go to <http://www.kingschools.com/wingx/Registration> to register WingX. This will enable the full functionality (XL Edition or Pro Edition).

#### **Frequently Asked Questions:**
